DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I (claims 1-10) in the reply filed on 14 December 2005 is acknowledged. The traversal is on the ground(s) that the "Examiner has not shown, nor even alleged, that the groups of claims identified by the Examiner are independent". This is not found persuasive because distinctness is adequate to establish a proper restriction requirement. Moreover, applicant's cancellation of claims 11-17 makes the issue moot.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 5-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3711

Regarding claim 5, it is not clear if the outer poles, inner poles, game pole and ball are intended to be different from the poles and ball already set forth in claim 3.

Claims 6-10 are rejected because they depend from a rejected claim 5.

Claim Rejections - 35 USC §§ 102 and 103

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered

therein were made absent any evidence to the contrary.

Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent Number 697,574 (Walenta).

Figure 1 of Walenta shows a playing surface A. Pins H correspond to the recited marker. Outer pillars E (point values 10,15,25) correspond to the recited outer scoring area. Inner pillar E (point value 100) corresponds to the recited inner scoring area. Pins F correspond to the recited game pole. Balls G are inherently capable of being place on top of the game pole as well as inherently capable of being pitched or bowled at the pillars.

8. Claims 2-5 and 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walenta as applied above.

Regarding claims 2 and 10, the use of scoreboards with games involving points is old and well-known in the art.

Regarding claims 3 and 5, although Walenta only shows one inner pillar, discovering an optimum value of a result effective

Art Unit: 3711

variable has been held to be within the capabilities of the person of ordinary skill in the art. It would have been obvious to a person having ordinary skill in this art, by routine experimentation, to provide the game with any number of scoring targets in order to increase the opportunity for scoring.

Regarding claims 4, 8 and 9, it would have been obvious to one of ordinary skill in the art to use differently colored balls based on their point value.

Regarding claim 7, It would have been an obvious matter of design choice to modify the Walenta reference by having differently colored poles in order to further differentiate the point values associated with each pole.

Allowable Subject Matter

9. Claim 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
